DETAILED ACTION

1. Claims 1-10 are pending.

Election/Restriction

Applicant's election with traverse of Group II, Claims 1-3 and 7-10 in Paper No. 2. 11 is acknowledged. The traversal is on the ground(s) that the present claims satisfy the unity of invention and all of the compounds have the same utility. Applicants argue that Group II, Group IV and spirooxazole of Group IX are the same because they have 1,3-oxazole. The examiner disagrees with applicants. The special technical feature of each group is different one from the other. The only fragment common to all groups is the substituted. In regard applicant's argument that Group II, IV and Group IX are the same because they have 1,3-oxazole, the examiner disagrees because Group II is drawn to 1,3-oxazine (6-membered ring) not 1,3-oxazole (5-membered ring). Furthermore coexamination of each of the additional groups would require search of subclasses unnecessary for the examination of the elected claims. For example, the search for the invention of Group IV would include search of class 548, the search for the invention of Group IX would include search of classes 544 and 548. Therefore, coexamination of each of these additional inventions would require a serious additional burden of search.

The requirement is still deemed proper and is therefore made FINAL.

Application/Control Number: 10/031,795

Art Unit: 1624

Objection

Page 3

3. Claims 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the

base claim and any intervening claims.

Applicants also have to delete non-elected subject matter from said claims to overcome

the objection.

Non-elected Invention

4. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected invention. Cancellation of the non-elected subject matter is recommended in response to this Office Action.

Information Disclosure Statement

5. The IDS (Paper No. 4) was not initialed because the PTO Form 1449 and the references are missing. The examiner kindly request applicants to provide the 1449 and references. Note that the IDS (Paper No. 7) has been initialed and attached with this Office Action.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Page 4

Application/Control Number: 10/031,795

Art Unit: 1624

Claims 1-3 and 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

- a. Claim 1 and claims dependent thereon are rejected because the in claim 1 (line 9) the term "pyradinyl" is not clear. What is it? Is this pyridyl or piperidinyl? Like wise the same problem exists elsewhere in the claims (e.g. in claim 2 (line 16)).
 - b. In claim 7 (line 1), the term "compuns" should read as "compounds."
- c. In claim 10 (page 539, line 9), the word "conbined" should read as "combined."

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay Habte, Ph. D. whose telephone number is (703) 308-4717. The examiner can normally be reached on M-F (9.00AM- 5:30PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mukund Shah can be reached on 703-308-4716. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556.

Art Unit: 1624

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
